

# 为何加瑞®乳铁蛋白胶囊是你日常生活的一部分？

病毒和传染病有可能危害到任何人,有时甚至是健康的、充满活力的人。

乳铁蛋白是人体免疫系统的第一道防线!每一粒加瑞乳铁蛋白胶囊中包含200mg澳洲冷凝乳铁蛋白。

每日1粒,补充你的免疫系统需要的乳铁蛋白!

加瑞乳铁蛋白胶囊适合全家人补充!

- ✓ 抗细菌、真菌和病毒
- ✓ 促进人体对铁的吸收
- ✓ 抗氧化、有助于减少自由基对身体的危害

## 什么是乳铁蛋白？

乳铁蛋白是人体为对抗各种疾病,而天然形成的活性肽,它对人体免疫系统发挥重要作用。

人的初乳、母乳、泪液及其他身体分泌物中均含有乳铁蛋白。

加瑞澳洲冷凝乳铁蛋白提取自牛奶的乳清中,是一种活性、多功能糖蛋白(含有689种氨基酸)。不含乳糖,乳糖不耐症者可放心食用。

## 加瑞澳洲冷凝乳铁蛋白是什么？

本品采用ADP(澳洲乳蛋白公司)授权工艺生产。ADP坐落于澳大利亚昆士兰州,是澳洲最天然的乳制品区域之一。

ADP采用乳清分流技术,从新鲜牛奶中提取苯基苯乙酰胺乳铁蛋白。这些活性蛋白分离后,采用冷冻萃取技术经提纯,随后,冷冻干燥以最大限度保存其中的活性物质。

## 乳铁蛋白如何发挥作用？

乳铁蛋白在保护人体健康方面发挥着重要作用。乳铁蛋白的这一特点表现在以下几个方面：

- 抗氧化。乳铁蛋白能够结合铁离子,减少了自由基对人体的危害
- 抗菌。乳铁蛋白能够剥夺细菌生长所需的基本元素铁,从而达到抗菌效果
- 抗过滤性病原体。乳铁蛋白在减少细菌对哺乳动物核心细胞的损害面有显著效果。
  - 促进人体铁平衡。乳铁蛋白与人体铁元素有高度亲和性,它能将铁离子传递到小肠,完成铁在小肠的吸收和利用。
  - 抗炎症。乳铁蛋白能活化抗免疫反应的细胞。

## 咨询 & 疑问

乳铁蛋白——  
自然界能提取的最珍贵的  
活性蛋白之一

加瑞乳铁蛋白适合全家人补充！

每粒加瑞乳铁蛋白胶囊中包含200mg  
澳洲冷凝乳铁蛋白

加瑞乳铁蛋白胶囊不含任何糖、盐、  
酵母、麸质、淀粉、乳糖、防腐剂、  
人工色素、香精香料

食用方法：

每日1次，每次1粒

在压力较大、疾病或身体受损等特殊  
时期可适当增加食用剂量。

BIOSOURCE™  
the science of natural nutrition

# Why should Immune Plus become part of your daily routine?

Viruses and infections can and do attack anybody, even seemingly healthy, active people of any age.

Lactoferrin is the **FIRST LINE OF DEFENCE IN YOUR BODY'S IMMUNE SYSTEM**. Each Immune Plus capsule contains 200mg of Australian freeze dried Glycomax™ Lactoferrin.

By taking 1 or more **Immune Plus** capsules per day you are supplementing your immune system's supply of Lactoferrin – **PROVIDING MORE OF WHAT YOUR BODY NATURALLY PRODUCES**.

This means **Immune Plus** is suitable for the whole family, helping our bodies fight day to day illness. Potential areas of benefit include:

- ✓ Supports, promotes and enhances the immune system
- ✓ Supports the immune system while undergoing therapy or clinical care
- ✓ Assists in the maintenance and improvement of well being in the body
- ✓ May play an important role in defence mechanisms against bacteria, fungi and viruses
- ✓ May play an important role in immune regulation
- ✓ Is an iron binding glycoprotein that may facilitate iron absorption
- ✓ Has anti-oxidant properties, helping reduce the risk of free radical formation.

## What is Lactoferrin?

To fight day-to-day illness, your body naturally produces Lactoferrin, the ammunition your immune system needs.

Lactoferrin is a bioactive, multifunctional glycoprotein (containing 689 amino acids) found in the whey protein fraction of bovine (cow) milk.

Lactoferrin is also found in human colostrum, breast milk, tears, and other secretions of the human body, reinforcing its use in a broad spectrum of applications in human health.

Lactoferrin does not contain lactose, so should be appropriate for those with lactose intolerance. Consult your healthcare professional prior to taking this product.

## 'What is Glycomax™ Lactoferrin?'

Glycomax™ Lactoferrin is the active component in BioSource **Immune Plus**.

Glycomax™ Lactoferrin is manufactured, via a patented process, by Australian Dairy Proteins (ADP) a joint venture company between the Dairy Farmers Group & Probiotec, located at Malanda in the Atherton Tablelands in far north Queensland (one of the most natural unspoiled dairying areas in Australia).

ADP uses the fresh Whey stream from the dairy production process at Malanda to extract Glycomax™ Lactoferrin.

These bioactive proteins are purified using chilled, gentle extraction techniques, followed by freeze drying to maintain the maximum activity and purity of Glycomax™ Lactoferrin.

The Glycomax™ Lactoferrin in **Immune Plus** helps boost your immune system levels to provide added protection.

## How does Lactoferrin work?

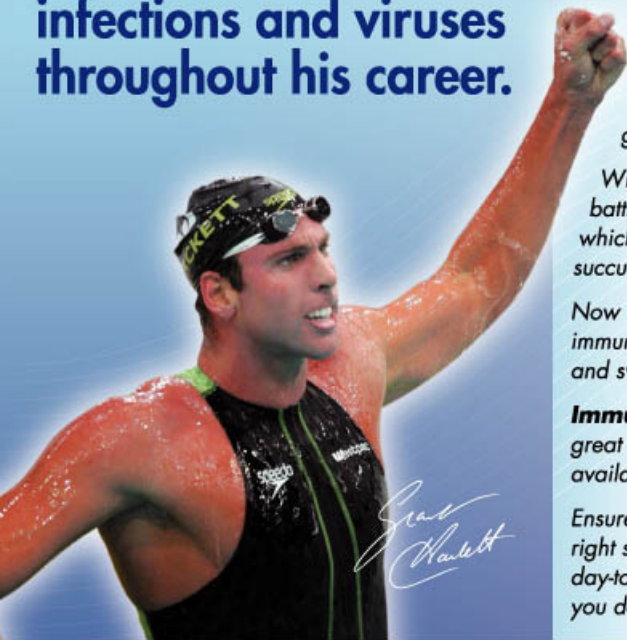

It has been suggested that Lactoferrin plays a role in supporting and complementing the human immune system. The properties of Lactoferrin can be summarised as follows:

- Antioxidant properties, due to its ability to bind iron and reduce the risk of free radical formation
- Antimicrobial properties, due to its effect on microbial membranes and its ability to deprive harmful bacteria (pathogenic organisms) of a viable source of iron, required for growth
- Antiviral properties, due to its apparent ability to reduce the risk of binding of the virus to the mammalian host cell
- Bioavailable iron properties, due to its high affinity to iron and its ability to transport iron into the small intestine
- Immunostimulant properties, due to its ability to stimulate the immune system and take part in the body's defence against infections
- Anti-inflammatory properties, due to its activation of cells involved in the anti-inflammatory response.

# Grant Hackett has been impacted by various infections and viruses throughout his career.

*"Whether I'm training or racing I always strive to improve my performance – to reach new goals. But to achieve these goals, your body has to be in the best possible shape.*

*With all the stress from my heavy workload and day-to-day battles – I swim up to 80 kilometres a week in the pool which is around 1600 laps – my body would invariably succumb to infection.*

*Now that I'm taking **Immune Plus** to supplement my body's immune system, my focus is where it really matters – in the pool and swimming all those laps!*

**Immune Plus** has been great for me and now it is available for ALL Australians.

*Ensure your body is in the right shape to fight your own day-to-day battles... even if you don't swim all those laps!"*

**Immune PLUS**

Questions?  
Information?

**"Lactoferrin – the first line of defence in your body's immune system."**

Each capsule of BioSource **Immune Plus** contains 200mg of Australian Freeze Dried Glycomax™ Lactoferrin.

**Immune Plus** does not contain added sugar, salt, yeast, gluten, starch, lactose, preservatives, artificial colours, flavours and sweeteners.

#### DOSAGE

**Standard dose** – Take 1-2 capsules daily, or as directed by your healthcare professional.

During periods of increased stress, physical exertion or illness, increase dosage levels to 3 capsules daily.

Use only as directed.  
Always read the label.

Talk to your health professional about taking **Immune Plus...** and keep on smiling.
